

GURPREET SINGH SAHNI

CLOUD ARCHITECT • INFRASTRUCTURE STRATEGY • CONTAINERIZATION SPECIALIST

Jalandhar, India | +91-9315359351 | gurpreet.sahni@gmail.com | linkedin.com/in/gurpreet-singh-sahni-331410182

PROFESSIONAL SUMMARY

Forward-thinking Cloud Architect with nearly 5 years of demonstrated expertise evaluating, designing, and managing robust enterprise cloud infrastructure solutions across AWS and multi-cloud environments. Expert in advanced container orchestration using Kubernetes (Amazon EKS) to drive highly scalable and resilient deployment strategies. Capable strategist at analyzing designs, assessing risk, and authoring architecture documentation to maintain robust security and compliance baselines. Proficient in engineering automation frameworks using Bash and Python to streamline data center integrations and systems monitoring. Adept at breaking down complex technical topologies to articulate clear architectural direction for stakeholders and data-lab environments.

ARCHITECTURAL CORE COMPETENCIES

Cloud Architecture	Amazon Web Services (AWS Architecture, IAM, VPC, Route53, Advanced Load Balancing, CloudWatch), Azure Foundations (AZ-900), GCP Infrastructure Principles
Container Orchestration	Kubernetes (Amazon EKS), Container Deployment & Scaling Strategies, Docker Containerization, Multi-stage Builds, Helm Charts
Automation & Scripting	Infrastructure Automation, Bash Scripting, Python, Automation Frameworks, Integration Systems, System Performance Monitoring
Security & Compliance	Cloud Infrastructure Security Concepts, Risk Mitigation, Compliance Standards Verification, Disaster Recovery Planning, Data Isolation
Design & Review	Infrastructure Design Assessment, Robust Architecture Documentation, Architecture Best Practices Recommendations, Technical Consulting

PROFESSIONAL EXPERIENCE

Rackspace Technology — Cloud Architect I / II (Infrastructure & Orchestration Focus)	Sep 2023 – Present
Infrastructure Assessment & Design: Reviewed and assessed complex cloud infrastructure blueprints, recommending optimizations and structural improvements aligned with architectural best practices to support scalable workloads. Architecture Documentation: Created and refined comprehensive architecture documentation, runbooks, and blueprints to support robust, secure, and horizontally scalable production environments. Kubernetes Strategy: Leveraged advanced expertise in Kubernetes to design container orchestration, automated pod scaling, and multi-region deployment strategies across enterprise Amazon EKS clusters. Automation & Operations Streamlining: Programmed specialized automation scripts using Bash and Python to streamline cloud operations, internal system integrations, and multi-layered infrastructure monitoring. Risk & Security Mitigation: Proactively identified and resolved potential security, access control (IAM), and network compliance risks within large-scale distributed cloud networks. High-Availability Maintenance Design: Engineered low-risk Blue/Green zero-downtime cutover strategies for database migration lifecycles, ensuring seamless application traffic transitions.	

- **Advanced Systems Analysis:** Resolved complex runtime, networking, and traffic ingress faults in production, providing root-cause guidance to improve overall reliability frameworks.

Avancer Corporation — Associate Cloud Engineer (Infrastructure Design & Migration)

Feb 2021 – Sep 2023

- **Cloud Solution Provisioning:** Designed and deployed robust cloud architecture primitives leveraging Terraform templates and AWS CloudFormation following modular, declarative design practices.
- **Workload Containerization:** Migration expert driving the movement of multi-tier legacy systems into optimized Docker images, establishing clean deployment automation pathways.
- **CI/CD Pipelines:** Constructed scalable continuous integration and automated deployment architectures utilizing Jenkins and GitLab pipelines to decrease turnaround delays.
- **Technical Communication:** Translated complex infrastructure concepts clearly and concisely to align engineering squads, ensuring seamless project management milestones.

KEY ARCHITECTURAL PROJECTS

On-Premise Container Deployment Framework from Scratch: Architected and containerized an application workspace completely from scratch utilizing Docker. Engineered a highly portable Bash distribution package providing client-side automatic image injection, isolated bridge configurations, and deployment monitoring to streamline remote installations.

Enterprise Infrastructure Automation Blueprinting: Standardized corporate multi-region cloud landing zones by engineering reusable, production-ready Infrastructure as Code (IaC) architectures.

Production Cluster Traffic Modernization: Redesigned and implemented high-availability entry points and traffic paths inside production container landscapes, resolving networking compliance vulnerabilities.

CERTIFICATIONS & ACHIEVEMENTS

- HashiCorp Certified: Terraform Associate
- Microsoft Certified: Azure Fundamentals (AZ-900)
- AI Ready Badge – Rackspace Technology

EDUCATION

B.Tech in Computer Science

Guru Gobind Singh Indraprastha University (2021)

Academic Performance: CGPA: 8.39 / 10
